PROFESSIONAL SUMMARY

Passionate and determined, I am _Mohamed_, a visionary individual with a burning passion for web development and a knack for turning life's _challenges_ into **opportunities for growth**. Originally from Morocco and also holding Spanish nationality, I decided to come to Belgium in 2020 to pursue a master's degree in computer science. Despite the global pandemic, I courageously navigated through the uncertainties by taking a job in a supermarket while dedicating my _evenings_ and _weekends_ to **self-study** in web development. Through this journey, I honed my skills in NextJS, React, JavaScript, HTML, CSS, and more, showcasing my commitment to **continuous learning** and **adaptability**. My experiences have shaped me into a versatile professional ready to embark on the next chapter in professional web development, bringing along a unique blend of **resilience**, **technical** expertise, and passion for **innovation**.

PERSONAL PROJECTS

PORTFOLIO
- Developed a comprehensive portfolio using React, Next.js, and TypeScript.
- Styled with Tailwind CSS for utility-oriented design.
- Integrated React Email & Resend for handling email communications in the contact form.
- Integrated Framer Motion for interactive animations.
- Hosted on Vercel for optimal performance.

View Project | Source Code

CORPCOMMENT
- Created a sophisticated public feedback application with React and TypeScript.
- Integrated a RESTful API for real-time data persistence.
- Utilized Zustand for efficient state management.
- Designed a visually stunning user interface with Tailwind CSS.

View Project | Source Code

TREKBAG
- Developed a travel packing assistance application using React and TypeScript.
- Implemented a robust packing list management system.
- Utilized the localStorage API for data persistence.
- Utilized Zustand for efficient state management.
- Designed a user-friendly and visually appealing interface using Tailwind CSS.

View Project | Source Code

TASTYTREAT
- Created a web-based food delivery application using React, Bootstrap, Redux, and Firebase.
- Implemented user authentication with Firebase.
- Developed a shopping cart and dish search system.
- Utilized Redux for state management.
